Strato VERO

Complete co-ordinated surface system

WALL TILES WALL PANELS FLOOR TILES

Strato VERO

Strato VERO is a high-quality collection of waterproof wall panels/tiles and floor tiles, created to combine modern luxury with quick installation and easy, low maintenance living.

Manufactured using advanced stone polymer composite (SPC), **Strato VERO** panels and tiles are 100% waterproof and deliver a number of benefits when compared with traditional wall and floor panel/tile options.

- ✓ **More hardwearing** than laminated MDF
- ✓ **Better value** than acrylic alternatives
- ✓ **More contemporary** than standard PVC finishes

Designed to be lightweight and easy to handle, **Strato VERO** panels feature an innovative Seamless Groove Click System, creating a clean, streamlined appearance without the need for joining trims between panels, except at corners. Unlike traditional tiles, grout is not required, helping make installation quicker and cleaner.

What Makes **Strato VERO** Stand Out?

Its exceptional choice of finishes. From natural matt stone-inspired textures to eye catching high gloss marble designs, there's an option to complement every interior. Transform walls and floors with the look of real materials, without the high cost and ongoing maintenance associated with traditional installations. Whether you're updating a single room or completing a full bathroom transformation, our waterproof panels/tiles offer a stylish, practical solution for projects of every size.

All panels/tiles come in three versatile sizes and types. All panels/tiles can be cut to fit your space.

Wall Tiles

30cm x 60cm or 45cm x 90cm
4mm thick

Wall Panels

60cm x 260cm or 120cm x 260cm
4mm thick

Floor Tiles

30cm x 60cm or 45cm x 90cm
5mm thick + 1.5mm IXPE underlay
Floor tile slip rating: R10
Strato VERO SPC flooring needs to be laid in a brick bond pattern

Modern Style

The Material

1 UV Coating Layer

High performance UV coating treatment can effectively prevent damage to the board caused by ultraviolet rays.

2 Decor Film Layer

Popular texture patterns suitable for various home styles. High definition, intricate textures closely mimic real materials.

3 SPC Rigid Core

High performance composite panels that combine the exceptional qualities of stone and plastic, delivering outstanding strength and resilience.

The Collection

Oslo White

8

Venice Marble

10

London Grey

12

Navona Ivory

14

Pompeii Beige

16

Oslo White

Oslo White marble is distinguished by its crisp, bright backdrop and delicate grey veining. The wall panels and tiles feature a polished gloss finish, while the floor tiles are designed with a smooth matte surface.

Wall Tiles

OWWT3060: 30cm x 60cm

OWWT4590: 45cm x 90cm

Wall Panels

OWWP60260: 60cm x 260cm

OWWP120260: 120cm x 260cm

Floor Tiles

OWFT3060: 30cm x 60cm

OWFT4590: 45cm x 90cm

Venice Marble

Venice marble is recognised for its clean, refined background, enhanced by delicate white veining and an elegant decorative marble effect. The wall panels and tiles feature a high gloss finish, while the floor tiles offer a subtle matte texture.

Wall Tiles

VMWT3060: 30cm x 60cm
VMWT4590: 45cm x 90cm

Floor Tiles

PBFT3060: 30cm x 60cm
PBFT4590: 45cm x 90cm

Accessories

Metal Tile Trims

Metal tile trims are available in three styles to compliment the wall tiles and panels. They are available in five colours to match the five styles. They come in 2.6m lengths.

Accessories

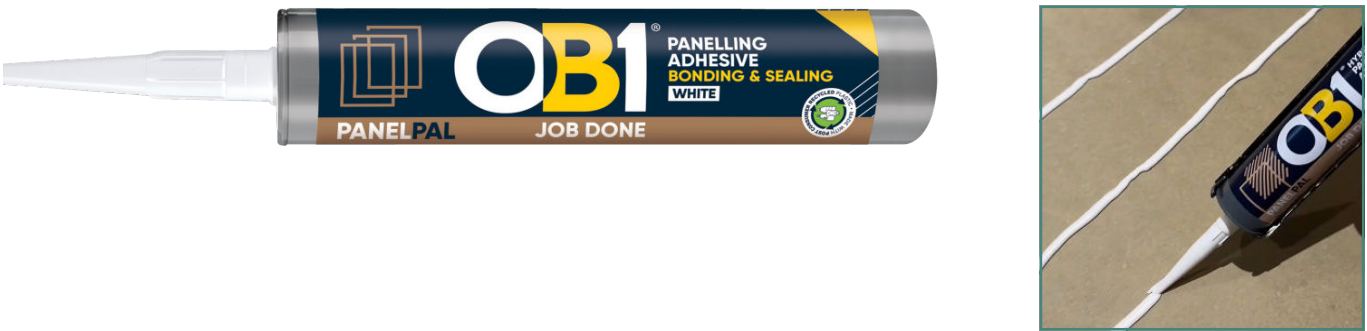

OB1 PanelPal

Premium Panelling Adhesive

For the best installation results, we recommend using **OB1 PanelPal**.

OB1 PanelPal is a very strong, vertical high-grab adhesive with an easy-to-apply hybrid formula, designed to create a secure and long-lasting bond once cured with moisture in the air. Specially developed as a universal adhesive, it is suitable for bonding a wide range of porous and non-porous building materials.

For optimal performance, **PanelPal** should be applied in vertical lines during installation to avoid any moisture pooling behind panel.

Hydro Ban®

When installing any bathroom panelling system, we strongly recommend tanking the installation area with **Hydro Ban®** to help prevent the build-up of mould and mildew behind the panels.

Hydro Ban® is a thin, load-bearing waterproofing and crack-isolation membrane that does not require reinforcing fabric in the main field, coves, or corners. This single-component, self-curing liquid rubber polymer forms a flexible, seamless waterproof membrane that bonds directly to a wide variety of substrates.

Advanced antimicrobial technology is integrated during the manufacturing process, providing continuous protection against the growth of stain and odour-causing microbes, including bacteria, mould, and mildew.

OB1 Panel Pal and **Hydro Ban®** are available from **Tile Rite**.
